## VACANCY

### OLEO DESIGN ENGINEER

---

Oleo is a world leader in the Design and Manufacture of safety critical equipment for a diverse industrial base. Our main manufacturing base is in Coventry, with a smaller manufacturing facility in China.

Our Technical Department is looking to recruit an experienced **Design Engineer**, who is comfortable with all aspects of design. Whether it be creating new and innovative designs or practical discussions with our Production Engineers.

**Main purpose:**

To design and maintain cost effective products compatible with customer expectations.

**Missions:**

Design Engineers work on a project from the initial brief, through the design, development and testing stages, following the project through to final manufacture and implementation.

Work closely with members of other departments, to ensure their input is considered early in the design stage and ensure a smooth product introduction. Be customer focused and promote Oleo International's reputation.

Maintain product integrity.

**Tasks:**

- Work in accordance with engineering procedures.
- Produce 3D models and detailed drawings.
- Support Development and Test activity.
- Carry out maintenance of design activity.
- Maintain product integrity.
- Support the implementation of Safety First.

**Skills & Experience:**

- Degree in Mechanical Engineering (2:1 minimum).
- Experience on 3D CAD ideally Solid works.
- Familiarity with Finite Element Analysis.
- Proven experience in a manufacturing company dealing with Production.

**Competitive salary offered**

**Company stakeholder pension scheme**

**33 days Holiday including Bank Holidays**

If you are interested in this position then please email your CV outlining your current/expected salary to:

**janet.hamilton@oleo.co.uk**
