The Oleo apprenticeship scheme is designed to engage and nurture our next generation of engineering talent.

If you are mechanically minded and looking for a different route into a career that bypasses the burden of a student loan, with the opportunity to ‘earn while you learn’, then the Oleo apprenticeship scheme could be for you.

This is an excellent opportunity to join a World leader in the design and manufacture of safety critical equipment used in a wide range of applications in the Rail, Elevator and Industrial sectors.

The apprentice scheme will provide you with a mix of work experience, training and academic learning and you will be fully supported by the company.

Continually working to develop your skills and knowledge throughout your apprenticeship with the aim of becoming a fully qualified and competent member of the team in one of the following disciplines:-

- Development
- Production Engineering
- Machining
- Assembly

To apply you must have minimum of 5 GCSE’s including Maths (A-C), English (A-C), Science (A-C).

Applicants who meet the above criteria will be invited to attend an initial interview and skills/aptitude test at a local training centre; followed by a final interview at Oleo. If selected we will match your aptitudes, abilities and preferences against our business requirements to place you on the most appropriate skills pathway.

To apply for one of the above apprenticeships please send your application to
